

A Personal Story

“I was traveling when it happened,” said Ruth. “I sustained a fracture and had to wear a neck brace for three months.” Ruth experienced the fall in 2009.

“I felt so helpless”

An active, independent 86-year-old woman, who lives alone, Ruth now knows the danger of falls for older adults. The neck brace made life difficult for Ruth. “I had to rely on my daughter to drive me to appointments and take me shopping,” she said. Now I move slower and am more careful,” she said. “I still have to do my exercises to keep myself strong.”

“Now I exercise four times a week at a gym. And I definitely don’t want to fall again!”

Preventing Falls

Stopping falls...one step at a time:
fall prevention tips for older adults

Myth vs. Reality

Myth:

If I lower my activity level, I will not fall.

Reality:

Physical activity will help you increase strength.

Home Safety Checklist

- ✓ Remove items and objects on the floor or staircase that you can trip over.
- ✓ Install lights and handrails on staircases.
- ✓ Remove throw rugs.
- ✓ Place grab bars in the tub and next to the toilet.
- ✓ Use non-slip mats in the tub or shower.
- ✓ Keep your home well lit.
- ✓ Place items you use daily in easy to reach cabinets. Avoid step-stools.
